

DSCI 351 Recommender Systems

Project: build a recommender system

What to submit:

- A pdf file of your project report.
- A Python code file.
- Presentation slides
- Presentation (in class).
- Dataset, or link to the dataset.

Your report should at least include the following sections. (3 pages maximum)

1. Provide description of the dataset.
2. What is the type of the recommender system you would like to build?
3. What is/are the method(s)/model(s) utilized in your system?
4. How to interpret the recommended results?
5. How to evaluate your system's performance?
6. What is the limitation and future improvement of your system?
